IP ADDRESS MANAGEMENT: STUCK IN STONE AGE OF SPREADSHEETS?

IPAM DECISION PROCESS START

美

CROSS YOUR FINGERS AND HOPE THAT NOTHING BREAKS OR CHANGES ON YOUR NETWORK.

CROSS MY HEART, N<mark>ever</mark>

Have you ever been called after hours for an IP issue?

YES

SUGKS

To be you

How do

you know?

I THINK SO

Does your

the information

in your spreadsheet? Do you find out about subnet exhaustion too late when users can't get on?

YES

Are you using a spreadsheet to manage IP addresses?

YES

Are you the only one who maintains it?

YES

YES

Do you ever go on vacation or sleep?

• YES, iT DOES

Do they report directly to you?

YES

Can you count on them to maintain it? Will you need to manually reconfigure server IPs

in a new subnet?

YES

Do you

have an automated tool to scan and recover free IPs in existing

subnets?

Wouldn't you

rather make life

easier with a professional IPAM tool?

YES

65

YES

lf a

subnet is full

can you just use a/23 to roll to the next

free class C range? YES

YES

YES

Are you

managing IPs for virtual

environments?

Are you manually assigning IPs for VMs?

YES

Are you using a spreadsheet to track VM reservations?

e you using

Are you using a professional IPAM product to manage your IP infastructure?

YES
